Expansion tubes x2
Installation Guide

1. Open the package and take out the ceiling lamp. Push the latch switch inward to remove the base.

2. Mounting the base
   Method A: Insert the power cable into the threading hole and mount the base to the ceiling light box using self-tapping screws. Check the base is securely mounted (recommended).

   Method B: Please check the two mounting points on the lamp box to make sure they are intact. Insert the power cable into the threading hole and mount the base to the ceiling light box using metric screws. Check the base is securely mounted.

* Please be sure to cut off the power supply before installation to avoid electric shock. Please strictly follow the steps in the installation manual. Improper installation may cause accidents such as falls, fires, and electric shock.
3. Connect the power cable, a suitable wire should have a cross-sectional area of 1.5-2.5mm². Strip off an 11-13mm long power cable according to the following picture.

![Diagram showing power cable connection and arrangement.]

4. Hold both edges of the lamp body with two hands (do not press the light-emitting surface), align the lamp body with the mounting base and push both sides up lightly at the same time until it clicks, indicating that the installation is complete (please check the latches on both sides of the lamp body are fully secured).
Remote Control Connection Instructions

Make sure the remote control and the Yeelight LED ceiling lamp are in the same room. Turn on the ceiling lamp and perform the following within 60 seconds: simultaneously press the "OFF" and "M" buttons on the remote control and release immediately. The indicator light on the remote control will blink to indicate that it is connecting. Wait until the indicator light blinks periodically, indicating that the connection is successful.

Function description

- ON: Turn on
- OFF: Turn off
- Color temperature adjustment
- M: Moonlight night lamp
- Increase the brightness
- Reduce the brightness

Intelligent Control

1. Scan the QR code or download the Yeelight app from the app store;
2. Make sure the ceiling lamp is on, open the app, and follow the instructions provided in the app interface.

* Make sure you are using Wi-Fi and are connected to the Internet.

This product is compatible with Mijia Intelligent Platform and can be controlled by "Mijia" App. It supports MIUI system and can be connected and communicated with other products from Mijia Intelligent Platform.

Factory Reset

Turn on and off the switch consecutively 5 times (on for 2 seconds and off for 2 seconds each time). The ceiling lamp will be in breathing mode. After 5 seconds, it will automatically restart and restore to the factory settings.

* When using the ceiling lamp in a new network environment, it has to be restored to the factory settings and re-connected to the network.
Basic Parameters

Product Model: YLXD01YL
Color Temperature Range: 2700K-6500K
Operating Temperature: -10°C to +40°C
Operating Humidity: 0% to 85% RH
Service Life: Approx. 25,000 hours

Power Factor: 0.9
Rated Power: 28W
Rated Input: 220V - 50/60Hz 0.127A
Supported Platforms: Android 4.4 and iOS 8.0 and above
Wireless Connection: Wi-Fi IEEE 802.11 b/g/n 2.4GHz, Bluetooth 4.2 BLE

Product Features

- Color temperature adjustment
- Dimming
- Moonlight night lamp
- Color rendering index
- Dust-proof
- Intelligent scenes
- Mobile control
- Firmware upgrade
Safety Instructions

1. Before use, please make sure that your voltage is appropriate to the product's working voltage. Using the product at a voltage other than the specified one may damage the product and create safety hazards;
2. The LED module cannot be replaced. Do not disassemble the product without proper authorization;
3. The ceiling lamp will produce heat when it is on. Please maintain proper air flow around it for heat dissipation purposes.
